TRAVELING TIPS:

- Bring enough medication for entire trip.
- Fill prescriptions well in advance. Unexpected delays arise often.
- Carry ALL prescription medication with you in carry-on luggage. Do NOT pack medication in checked luggage.
- Keep medication in original containers with original prescription labels.
- Bring a doctor’s note stating you have been prescribed [medication name(s)] for your medical condition.
- Once you arrive at destination, store medication in secure location.
- Traveling outside of the US?
  Other rules of law may apply in other countries. Bring a note from your doctor stating that you have been prescribed [medication name(s)] for your medical condition.

Traveling with Liquid Medications:

TSA permits prescription liquid medications needed by persons with disabilities and medical conditions.

You are not limited in the amount or volume of these items you may bring in your carry-on baggage.

However, if the liquid medications are in volumes larger than 3.4 ounces (100ml) each, they must be declared to a Transportation Security Officer.

Declared liquid medications should be kept separate from all other property submitted for x-ray screening.
