

research participants needed!!!

For the development of a new occupational therapy assessment: **The Wilder-Addison Narcolepsy Function Scale (WANFS)**. The WANFS is designed to better understand how Narcolepsy impacts everyday life and functional performance, not just sleep symptoms.

WHO?

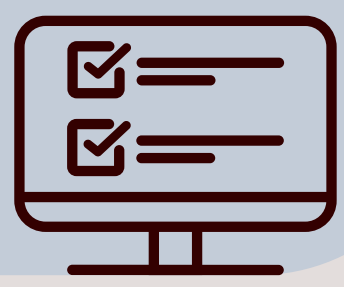

You may participate if you...

- ✓ Are 18 years or older
- ✓ Have a diagnosis of Narcolepsy (Type 1 or Type 2)
- OR**
- ✓ Do NOT have Narcolepsy and are willing to participate as a comparison group

This study is a...

- 15-20 minute virtual assessment
 - Completed online
 - Researcher present to answer any questions
 - Camera use not required
- Confidential participation

WHAT?

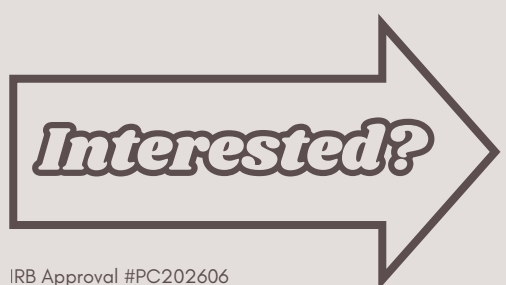

WHY?

By taking this assessment, you will...

- ✓ Help improve how Narcolepsy is understood in healthcare
- ✓ Contribute to the development of a new, evidence-based OT assessment
- ✓ Receive individualized feedback on functional patterns

Your participation supports research that aims to improve care and quality of life for people with Narcolepsy.
